Nokia 810 Contact Download Application User guide

To make it compatible and get your phonebook into the carkit, you need to install a third party software on this phone: 'Nokia 810 Contact Download' application.

How to install this software on your phone ?
You need to install it on your phone with a PC with Bluetooth connectivity (such as a Bluetooth Dongle).

Please follow these steps :

1. **Please pair your phone to the car kit and switch off your engine.**
2. **Launch the bluetooth manager that is provided with the Bluetooth Dongle's software.**
3. **Find all the bluetooth devices and select your phone.**
4. **Use the OBEX FILE TRANSFER feature of your phone.**
5. **Define a Bluetooth PIN code.**
6. **A window will appear on your phone, enter the same bluetooth PIN code.**
7. **Send The software you have downloaded to your phone. Don't forget to accept the file transfer on your phone.**
8. **You will receive a message on your phone. Open it and follow the instructions. Wait until the download is finished.**
9. **If the installation is successful you should find an icon with a car and a computer.**

Once you have installed the specific software on your phone :

1. **Please make sure your phone is paired to the car kit.**
2. **Switch off your car kit.**
3. **On your phone go to the MENU screen.**
4. **Select the software you have installed : the icon with a car and a computer.**
5. **Select the OPTIONS command.**
6. **Select OPEN command.**
7. **Select the OPTIONS command again.**
8. **Select OPEN command.**
9. **Then switch on your engine.**
10. **Wait until the car kit tell you the end of the synchronization.**

You can now assign voice tags. Refer to the voice commands menu.
